Sometimes adding permanent staff isn't the answer. There are many circumstances where the use of a Consultant or Interim manager just makes more sense.

- Financial restrictions
- Hiring freeze
- Short-term need for a specific project
- Interim talent during search for permanent staff
- Handling workload while determining strategic direction
- ...many, many others

You like to work with people you know but you also want the best. Your own network sometimes fails to surface the specific talent you need. Or networking beyond your immediate contacts takes too much time away from your primary responsibilities.

### That's Why We Created Consult Link!

For 24 years Rosemary Cass Ltd. and Soundview Search, Inc. have provided outstanding executive search to the pharmaceutical, biotechnology, and related healthcare industries. We have recruited in all disciplines within those industries and have what is probably the most extensive database and network in the industry. Therefore we have been able to assemble a portfolio, always growing, of Consultants with background and expertise in all of the disciplines specific to our industry. And we will search beyond our portfolio when necessary.

If you have need of a Consultant call us and let us know specifically what you are looking for. We will introduce you to Consultants, and even Teams, who meet your needs. There is no fee for the introduction. You negotiate terms directly with the Consultant, and only if you enter into a consulting agreement is there a fee – a fee so small that it's just not time efficient for you to do the networking yourself. A nominal fee is charged to both the company and the Consultant when an agreement is signed.

Let us put our match-making skills to work for you and find you what you need!

## We Work Exclusively In These Industries
